- Adaptation of Boilers & Pressure Vessels Ordinance 2002.
- Conduct of Census of Manufacturing Industries.
- A scheme "Improvement and Up-gradation of Boilers Inspection Wing" has been approved by the Planning & Development Department, Government of the Punjab with the cost of Rs.10 Million.
- A Scheme "Sports Goods and Material Testing Laboratory" is under process in Planning & Development Department, Government of the Punjab. The estimated cost of the scheme is Rs.450 Million.
- The proposal for Capacity Building of Directorate of Industries Punjab is under process in Industries, Commerce & Investment Department, Government of the Punjab with the estimated cost of Rs.109.75 Million.

Preface

Pre-investment studies for the districts in the Punjab were first published by the Directorate of Industries and Mineral Development, Punjab in the year 1979, with the prime objective of providing data which might interest private entrepreneurs and the framers of the Provincial and National Strategies in the industrial sector.

The second, third, fourth, fifth and sixth series of Pre-investment Studies for all districts of Punjab were published in 1983, 1992, 2002, 2006 and 2009 respectively. The present edition is seventh in the series.

This study basically updates the information contained in sixth series of district pre-investment studies. Efforts have been made to provide latest information collected through published sources, offices of the respective Government Departments/Agencies and District Offices of Industries Department. Quality addition of Industrial Policy Framework, recently promulgated Special Economic Zone Act 2012, Strategic Trade Policy Framework (2012-15) and Digital Maps by Urban Unit has improved these studies significantly.

The information has been updated in respect of population, manpower, production of agriculture crops, fruits, vegetables, livestock, forest resources, ores/minerals, infrastructural facilities such as technical/vocational training facilities, communication net-work, sub-soil water quality/effluent disposal

facilities, power/gas supply, tele-communication facilities, industrial estates, dry ports, industrial financing facilities, loaning scheme of PSIC, industrial policy, investment policy, fiscal incentives, Special Economic Zone Act 2012 and Strategic Trade Policy Framework (2012-15) etc. New policy measures regarding declaration of negative and specified positive areas have also been incorporated.

The study also includes information regarding existing industrial pattern, industry wise installed capacities and details regarding existing major industrial units in each district.

Effort has been made to identify various industries considering the availability of raw materials, skilled labour, linkage between industrial units and local/national/international demand. The suggested industries are, however, merely of indicative nature and it is advisable that prospective investors should conduct detailed feasibility report before making final decision for investment.

It is worthwhile to mention that industrial sector in Punjab has grown gradually from 6,223 industrial units in 1975 to 17,857 industrial undertakings in 2010. Sectoral growth has also been registered, resulting in substantial value addition. Value addition chain can be maximized by processing the agricultural industrial waste like rice husk, cotton stock, maize and corn cob. Herbal products is another untapped area. Live Stock, Dairy Development and poultry are fast growing sectors. Processing of food products can fetch handsome dividends. Currently information technology sector is growing by 39% annually in Pakistan. Fashion

industry is also developing rapidly. Similarly, chemical sector has lot to offer by utilizing the available mineral resources as raw material.

Issue of energy shortage can be addressed by dealing with power generation as an industry. Local as well as foreign investors have golden opportunity to set up power generation stations based on coal and other alternate fuels, under the captive power plants policy allowed in the newly promulgated SEZ Act, 2012. Punjab offers very good opportunity to the local as well as foreign investors to set up small, medium and heavy industries in variety of sectors. It has a growing market of over 90 million consumers, abundant manpower / labour force and cheap raw material with reasonably controlled law & order.

The Industries, Commerce & Investment Department has sufficient institutional frame work of attached and autonomous bodies to look after the industrial issues. Directorate of Industries, Small Industries Corporation (PSIC), Board of Investment (PBIT), Punjab Industrial Estates Development and Management Company (PIEDMC), Faisalabad Industrial Estates Development and Management Company (FIEDMC) have blend of professionals from the public as well as private sector. These legal entities are working in close coordination with the Chambers of Commerce and Industries systematically to promote industrialization and trade.

Development schemes regarding establishment of Industrial Resource Centre at the Directorate of Industries, setting up Sports & Material Testing Lab at EPZ, Sambrial and Industrial Safety Institute are under consideration with the Planning and Development

Department. Completion of these schemes will definitely help in promotion of industrialization process with enhanced industrial safety.

I must record my appreciation to Mr. Muhammad Akram Awan, Senior Economist, who effectively planned, coordinated and provided the guidance to his team members for completion of this study. Credit also goes to Mr. Muhammad Jamil Chishty, Staff Economist for his dedicated support rendered in the completion process of this study and Mr. Waseem Haider, Stenographer, for his tireless typing and composition work on computer.

I am grateful to all the District Officers, Enterprise & Investment Promotion who provided the relevant information of their respective districts for incorporating in pre-investment studies. I am also thankful to various Provincial Departments for supplying the required data to the Directorate of Industries. My special thanks are due to Dr. Nasir Javed, Project Director, Urban Unit for the provision of digital maps and the Punjab Printing Press.

Any suggestion for the improvement of the study will be welcomed.

2010-11 was 44.558, 26.501 and 7.880 thousand M. Tons. A variety of vegetables are also grown in the district (Chapter 3, Section 3.1).

In district Faisalabad, there are 33 flour mills, 6 sugar mills, one major maize products manufacturing unit, 26 cotton ginning/pressing factories, 54 rice mills, 63 textile spinning mills having capacity of 496364 spindles and 22126 rotors, 35 textile weaving mills (Mill Sector) having 3847 power looms and a number of units manufacturing various types of textile products (Chapter-5).

In view of the availability of various types of raw-material and existing industrial units there seems little scope for additional sugar mills and flour mills. However, there are better prospects for solvent oil extraction, fruit juice/ pickles/ squashes, fruit concentrate and vegetable dehydration.

6.2 LIVESTOCK

As per Punjab Development Statistics 2011, the population of cattle, buffaloes, sheep and goat was 557, 1333, 58 and 1039 thousand heads respectively. As regards poultry, there are 1556 broiler, 630 layer and 39 breeding poultry farms having rearing capacity of 37,137, 3,877 and 435 thousand birds respectively. The annual

availability of hides and skins is estimated at 1986 thousand pieces.

There are 12 tannery units, 01 dairy products unit and 6 poultry feed mills already operating in district Faisalabad. However, there exists good scope for dairy farms, milk processing and dairy products, ice cream, animal/poultry feed, cattle/sheep/goat fattening farms, meat/poultry processing and even for a modern tannery unit.

6.3 INDUSTRY

District Faisalabad is centre of textile industry, Besides, a variety of other industrial units including sugar, fertilizer, chemical, engineering and steel products, rubber products, tannery, vegetables ghee, paints, etc. industries are operating in the district (Chapter-5).

As textile industry is the major source of foreign exchange earning of the country, therefore, it is appropriate to produce more value added textile products such as ready-made garments, printed fabrics, women fashion apparels, children fashion garments, men/women under garments, knitwear, sports wear, etc.

In addition to textile related products, there also exists good prospects for man-made fibre, fertilizer, dyes and pigments, textile related chemicals, pesticides, tanning chemicals,

tyres/tubes for truck, bus, car and tractor, plastic sheets, paints and varnishes, liquid sugar from molasses, paper and paper board from bagasse.

6.4 DEMAND BASED INDUSTRIES

Faisalabad city is the third largest city of the country and Faisalabad district is one of the major industrially developed districts of the country. It possesses all the necessary social and physical infrastructure facilities. Therefore, it should meet not only requirements of Punjab but national as well as the export market.

There exists a wide scope for establishment of electrical and electronic industries in district Faisalabad such as transformers, electric motors, electric meters, switch gear/control gear, aluminium conductors, components of air-conditioner / refrigerators / deep freezers, computers, capacitors / resistors / transistors, telephone sets, tele-communication equipment, tape recorders / stereo deck, T.V. picture tubes, electric wires/cables, etc.
