## Director's Message

After spending past two years in Directorate of Industries, Punjab, I feel very privileged to be writing this message as Director Industries, Punjab.

This is the time we publish the 7<sup>th</sup> edition of the District Pre-Investment Studies of 36 Districts of Punjab, which has now become synonymous with our commitment to helping Industrialists, new entrepreneurs as well as Researchers. As Director Industries Punjab, I have seen much change, like:

- Relocation plan for the industrial units located within residential areas to industrial estates / positive areas declared by the District Governments.
- Adaptation of Boilers & Pressure Vessels Ordinance 2002.
- Conduct of Census of Manufacturing Industries.
- A scheme "Improvement and Up-gradation of Boilers Inspection Wing" has been approved by the Planning & Development Department, Government of the Punjab with the cost of Rs.10 Million.
- A Scheme "Sports Goods and Material Testing Laboratory" is under process in Planning & Development Department, Government of the Punjab. The estimated cost of the scheme is Rs.450 Million.
- The proposal for Capacity Building of Directorate of Industries Punjab is under process in Industries, Commerce & Investment Department, Government of the Punjab with the estimated cost of Rs.109.75 Million.
- We launch our website [www.doi.pitb.gov.pk](http://www.doi.pitb.gov.pk).

Looking ahead, we are focused on accelerating the execution of growth and promote industrial investment in the province. I am incredibly excited about this and truly believe the best of time for industrial investment is yet to come, Insha Allah.

## Preface

Pre-investment studies for the districts in the Punjab were first published by the Directorate of Industries and Mineral Development, Punjab in the year 1979, with the prime objective of providing data which might interest private entrepreneurs and the framers of the Provincial and National Strategies in the industrial sector.

The second, third, fourth, fifth and sixth series of Pre-investment Studies for all districts of Punjab were published in 1983, 1992, 2002, 2006 and 2009 respectively. The present edition is seventh in the series.

This study basically updates the information contained in sixth series of district pre-investment studies. Efforts have been made to provide latest information collected through published sources, offices of the respective Government Departments/Agencies and District Offices of Industries Department. Quality addition of Industrial Policy Framework, recently promulgated Special Economic Zone Act 2012, Strategic Trade Policy Framework (2012-15) and Digital Maps by Urban Unit has improved these studies significantly.

The information has been updated in respect of population, manpower, production of agriculture crops, fruits, vegetables, livestock, forest resources, ores/minerals, infrastructural facilities such as technical/vocational training facilities, communication net-work, sub-soil water quality/effluent disposal

facilities, power/gas supply, tele-communication facilities, industrial estates, dry ports, industrial financing facilities, loaning scheme of PSIC, industrial policy, investment policy, fiscal incentives, Special Economic Zone Act 2012 and Strategic Trade Policy Framework (2012-15) etc. New policy measures regarding declaration of negative and specified positive areas have also been incorporated.

The study also includes information regarding existing industrial pattern, industry wise installed capacities and details regarding existing major industrial units in each district.

Effort has been made to identify various industries considering the availability of raw materials, skilled labour, linkage between industrial units and local/national/international demand. The suggested industries are, however, merely of indicative nature and it is advisable that prospective investors should conduct detailed feasibility report before making final decision for investment.

It is worthwhile to mention that industrial sector in Punjab has grown gradually from 6,223 industrial units in 1975 to 17,857 industrial undertakings in 2010. Sectoral growth has also been registered, resulting in substantial value addition. Value addition chain can be maximized by processing the agricultural industrial waste like rice husk, cotton stock, maize and corn cob. Herbal products is another untapped area. Live Stock, Dairy Development and poultry are fast growing sectors. Processing of food products can fetch handsome dividends. Currently information technology sector is growing by 39% annually in Pakistan. Fashion

industry is also developing rapidly. Similarly, chemical sector has lot to offer by utilizing the available mineral resources as raw material.

Issue of energy shortage can be addressed by dealing with power generation as an industry. Local as well as foreign investors have golden opportunity to set up power generation stations based on coal and other alternate fuels, under the captive power plants policy allowed in the newly promulgated SEZ Act, 2012. Punjab offers very good opportunity to the local as well as foreign investors to set up small, medium and heavy industries in variety of sectors. It has a growing market of over 90 million consumers, abundant manpower / labour force and cheap raw material with reasonably controlled law & order.

The Industries, Commerce & Investment Department has sufficient institutional frame work of attached and autonomous bodies to look after the industrial issues. Directorate of Industries, Small Industries Corporation (PSIC), Board of Investment (PBIT), Punjab Industrial Estates Development and Management Company (PIEDMC), Faisalabad Industrial Estates Development and Management Company (FIEDMC) have blend of professionals from the public as well as private sector. These legal entities are working in close coordination with the Chambers of Commerce and Industries systematically to promote industrialization and trade.

Development schemes regarding establishment of Industrial Resource Centre at the Directorate of Industries, setting up Sports & Material Testing Lab at EPZ, Sambrial and Industrial Safety Institute are under consideration with the Planning and Development

Department. Completion of these schemes will definitely help in promotion of industrialization process with enhanced industrial safety.

I must record my appreciation to Mr. Muhammad Akram Awan, Senior Economist, who effectively planned, coordinated and provided the guidance to his team members for completion of this study. Credit also goes to Mr. Muhammad Jamil Chishty, Staff Economist for his dedicated support rendered in the completion process of this study and Mr. Waseem Haider, Stenographer, for his tireless typing and composition work on computer.

I am grateful to all the District Officers, Enterprise & Investment Promotion who provided the relevant information of their respective districts for incorporating in pre-investment studies. I am also thankful to various Provincial Departments for supplying the required data to the Directorate of Industries. My special thanks are due to Dr. Nasir Javed, Project Director, Urban Unit for the provision of digital maps and the Punjab Printing Press.

Any suggestion for the improvement of the study will be welcomed.

## CHAPTER - VI

### FUTURE INDUSTRIAL POTENTIAL

Keeping in view the availability of raw material, skilled labour, linkage between the industrial units, local / national / international demand, future industrial potential of district Sialkot is discussed hereunder.

It should, however, be kept in mind that though the above mentioned factors facilitate the success of any industrial unit, yet the entire success depends upon the investors / entrepreneurs and the capabilities of the personnel having the managerial control because any of these factors, if lacking is manageable. Therefore, it is advisable that detailed feasibility of industrial projects must be carried out before making final decision of investment.

#### 6.1 AGRICULTURE

Main crops and fruit of district Sialkot are wheat, rice, guava and citrus. Their average annual production over the period 2008-11 was 522.31, 335.48, 6.29 and 1.29 thousand M.Tons, respectively. A variety of vegetables are also grown in the district (Chapter-3, Section 3.1).

There are 19 flour mills, 165 rice husking units, one sugar mill and one vegetable ghee unit already working in the district (Chapter-5).

In view of availability of raw-material and existing agro-based industries, there exist little scope for additional flour mills and rice husking units. However, there exists good prospects for rice bran oil, rice husk briquettes, maize products, dal mills, etc.

The annual availability of hides and skins is estimated at 295000 pieces.

In district Sialkot there are 134 tanneries, 381 leather garments/products manufacturing units, 3 leather footwear units and 459 leather sports goods manufacturing units.

In view of the above, there exists scope for dairy farms, animal/poultry feed and cattle/sheep/goat fattening farms.

### **6.3 FOREST**

District Sialkot is quite rich in forest resources. The annual average production of timber & firewood over the period 2008-11 was 0.75 and 0.212 thousand cubic meter respectively, which reflect very good prospects for wood seasoning / processing, furniture, chip / veneer board and flush door / window units.

### **6.4 INDUSTRY**

District Sialkot is traditionally centre of sports goods, surgical instruments, leather goods/garments, cutlery, musical instruments industries. There are also various types of plastic and metal based industries.

In view of the existing industries, there exists good scope for material testing laboratory, forging, electro plating unit, hospital furniture, disposable syringes, hospital gloves, steel furniture, cast iron pipe, steel pipes/tubes, galvanized iron pipe, industrial gloves, special thread for sports goods.

### **6.5 DEMAND BASED INDUSTRIES**
